

NEED HELP GETTING
STARTED?

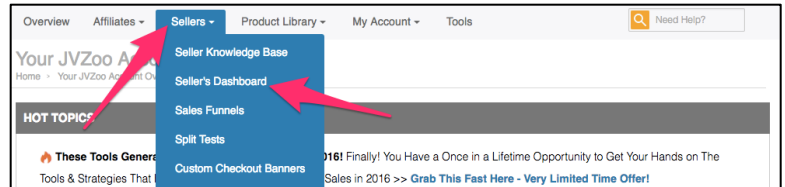

Setting Up A Dime Sale

Setting Up A Dime Sale

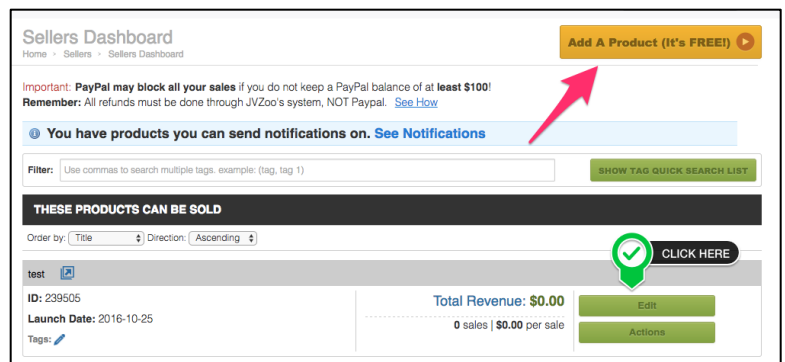

Step 1: Getting Started

First you will want to go to the *Sellers* tab and then click on *Seller's Dashboard*.

Step 2: Edit or Add a New Product

If you already have a product setup you can click on the green *Edit* button if you do not then you will want to click on *Add a Product*.

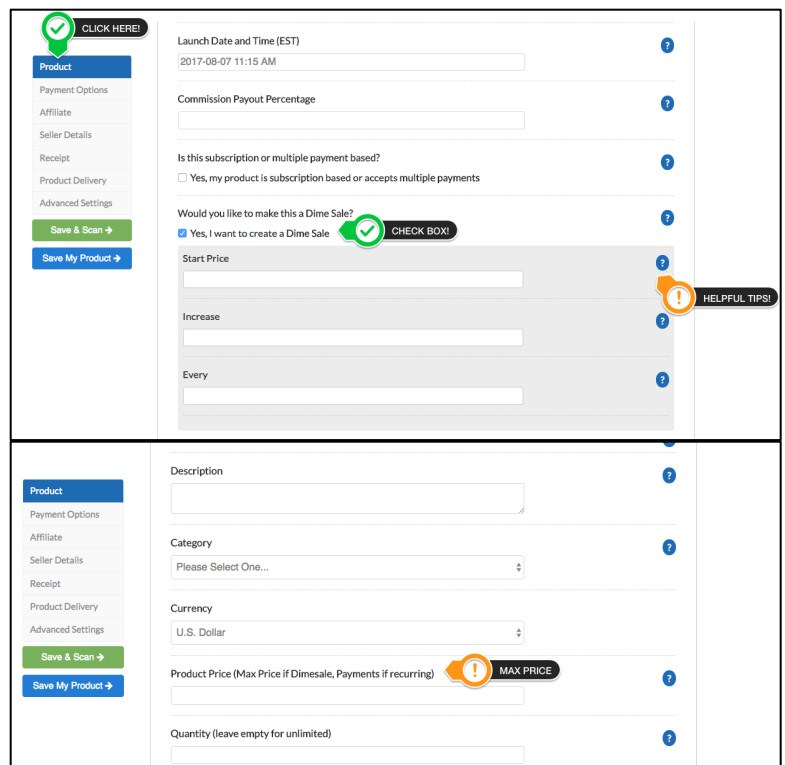

Step 3: Adding A Dime Sale

On the left-hand side you will click on *Product*.

Then scroll down until you see *Would You Like to Make this a Dime Sale?* Here you will check the box & enter what you want the start price to be, how much you want it to increase by and by how many sales.

For example if you want the starting price point to be \$1.00 & want it to increase by \$5.00 every 5 sales you would enter \$1.00, \$5.00 and 5.

****Remember** there are Zoo Tips next to each field. Click on the blue question mark to find an explanation on what information needs to be

entered. Also, what you enter in the *Maximum Price* field will be the max. price for your product no matter the total number of sales. You will find the *Maximum Price* field under the *Product* section on the *Product Edit Page*.
